

# Transportation for America

## Montana Campaign Partners

(As of July 28, 2009)

*“More transportation options will help people of all income levels avoid high gas costs and driving frustrations, make it easier to find an affordable home with access to jobs, and strengthen our cities, small towns and rural economies...now is the time for those of us who want healthy, safe and sustainable transportation choices to be working together to influence not only local policy, but one of the most important pieces of legislation in our country...one that will profoundly shape how we travel to jobs, health care services and educational and recreational opportunities in the future.”*

*Lisa Ballard of Current Transportation Solutions*

*“Montana community trails are a cornerstone of our community’s quality of life, and a small but important step along our nation’s path to energy independence and a healthier future...achieving this future is going to require significant investment in a diversified transportation system that balances roads, transit and bicycle/pedestrian facilities.”*

*Ted Lange with the Gallatin Valley Land Trust*

*“Montana and the nation need a transportation policy for the 21<sup>st</sup> Century that includes better funding for public transit, complete streets, and filling in and expanding our commuter, recreation and bike/pedestrian trails...we believe there has never been a better opportunity to voice our support for such ideas than this year as the federal transportation bill is up for renewal.”*

*Jackie Corday from Missoula Parks & Recreation*
